```javascript
1   import React from 'react';
2   import Head from 'next/head';
3   import PropTypes from 'prop-types';
4   import 'antd/dist/antd.css';
5
6   import wrapper from '../store/configureStore';
7
8   const NodeBird = ({ Component }) => {
9     return (
10      <>
11        <Head>
12          <title>NodeBird</title>
13        </Head>
14        <Component />
15      </>
16    );
17  };
18
19  NodeBird.propTypes = {
20    Component: PropTypes.elementType.isRequired,
21  };
22
23  export default wrapper.withRedux(NodeBird);
24
```
